**CURRICULUM
DEVELOPMENT**

[ATL]anta | Space + Cultural Meaning in a Transforming City 2016
Course development to explore relationships between architecture and cultural expression, particularly in communities experiencing rapid transformation, like the city of Atlanta. The course and projects were structured around the analysis of local artifacts including objects, music,

experiences, spaces, and architecture. Architectural propositions were developed in response to broader understandings of cultural practice, patterns, form, and experience.

Urban Form and Community | identity, place + development

2014

Course development to explore relationships between urban design and community development, including the facilitation of community workshops, design analysis, and co-design. Course developed in partnership with the Cascade Heights Improvement District.

First Year Seminar

2014

Course development for a first year seminar to support the successful transition and experience of new students in architecture and industrial design.

Fundamentals of Design and the Built Environment I

2012 - 2014

Fundamentals of Design and the Built Environment II

Curriculum re-design for the Common First Year (CFY) studio to support a full-scale design-build project for 100+ inter-disciplinary students. Coordination of instructors and teaching assistants to achieve common curricular goals. Coordination of learning outcomes with upper level architecture, building construction, and industrial design curricula.
